

formidAbility Environmental Policy

In line with our interest in health, good governance and the nurturing of a forward-looking arts sector, formidAbility is committed to minimising the impact of its activities on the environment.

- Minimise the printing of paper documents through the use wherever possible of tablet technology for score reading, digital paperwork shared through cloud technology, e-communications with patrons and donors, and predominantly web-based advertising.
- Minimise toxic emissions brought about by our work by encouraging the use of public transport wherever possible – though this is sometimes impossible for artists and audience members with physical accessibility requirements.
- Actively promote recycling in rehearsal, meetings and performance, including thoughtful sourcing of sets, props and costumes.
- Actively discourage single-use, non-recyclable plastics in rehearsal and performance spaces, such as non-refillable water bottles.
- Where we can, invest in local economies and community spaces.
